
Primary protocol: calibrated cross-layer output comparisons
Each point is one unit; no candidate passed all predeclared gates
Worst directional relative L2, queries 7–31
10^{1}
10^{0}
10^{-1}
n=15
n=960
n=30
not output-probed
initial gate failed
not output-probed
initial gate failed
Whole attention
QKV+gate/O head
QK map transplant
QK head transplant
V group transplant
Strict output error = 0.05
Approximate output error = 0.20
